

MAINTAIN SITES WITH EFFICIENCY

Maintenance processes are vital to keeping convenience stores operating at peak efficiency and maximum profitability. Titan Cloud's comprehensive platform helps owners and operators track maintenance tickets and work orders from entry to completion for a more streamlined, profitable business.

With customizable features for work order management, purchase orders, and vendor management, owners and operators can configure the Titan Cloud platform to meet their unique needs. Reporting functionality delivers real-time data right to the user's fingertips for more informed decision making and fewer re-visits.

NTE AMOUNT

Specify vendor pre-approval amounts, either client-wide or based on problem code, allowing vendors to request increases and gain approval prior to completing work and invoicing.

VENDOR CHECK IN CHECK OUT

Track how much time a vendor spent on site and review invoices electronically. If the invoice isn't quite right, dispute functionality allows comments to be made directly on the work order and emailed to the vendor for changes.

ASSET & WARRANTY TRACKING

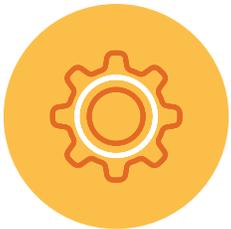

Tie work orders to specific assets so you can view vendor comments, warranty information, and dispatch history for a comprehensive view of all your equipment.

HOW CAN TITAN'S FACILITY PLATFORM HELP YOU?

CUT COSTS FOR MORE STRATEGIC SPENDING

Titan integrates your entire organization on one central platform for complete visibility into your maintenance process. Reduce your vendor costs with GPS tracking, invoice dispute functionality, and fewer dispatches, so you can spend your budget on other important needs.

KEEP YOUR FUELING ASSETS RUNNING

Upkeep of your revenue-producing assets is the focus of your entire maintenance process. Titan's facility platform allows maintenance professionals to customize their notifications, so they can address tickets quickly for minimal downtime.

MANAGE WORK ORDERS EFFICIENTLY

From creating a ticket to paying the invoice, Titan's comprehensive platform helps you manage repairs efficiently with its intelligent work order process. Tickets are prioritized and assigned to nearby vendors for quick resolution and minimal cost and once the repair is complete, vendors can upload invoices for immediate approval all from within the platform.

“Using [Titan's facility solution], we've streamlined our maintenance program, reducing our number of dispatches by hundreds each month, using localized approvals and ticket consolidation.”

- Operations Director, Leading U.S. Fuel Retailer
